Getting it right for every child
INTRODUCTION TO CHILD CONCERN FORM

This form was developed by the Police Lead within the *Getting it right for every child* Highland Pathfinder Team and originated from a previous police form.

Consultation was carried out nationally with all Scottish police forces to scope out what documentation already existed and what information was recorded. Consultation also took place with Health Visitors, School Nurses, Teachers, Social Workers, Children's Reporters and Police Officers locally to ensure that the form recorded appropriate and useful information.

The form is currently being used operationally by all Police Officers in Northern Constabulary and has been used in other areas of Scotland to assist in local developments. It is hoped that this form will be used by other agencies and Voluntary Organisations to record and share concerns about children in a common format.

This work is ongoing.
